| 1 | Swale between street and sidewalk near the NW side to capture the water runoff before it hits the street. Additional tree planting west of the baseball seating to provide shade. Rebuild or eliminate the brick pavers at the SW corner as they've sunk and hold water. Really like the idea of using the west side of sled hill (the fenced off piece) for uneven stairs or boulders to climb. Pull the sidewalk along the north end of the park a bit further way from the street and plant heavily to provide shielding from the lke ditch and Garfield. The need for police to see into the park for visual checks is best done from the east and west sides. |
| 1 | mile markers for distance around park Remember, it is a neighborhood park, but part of an overall system. It has to work for both the neighborhood and the entire Village |
| 1 | Connect the two playgrounds. Having one tot lot and the 5-12 playground in 2 different areas, does not work. How about a zipline in the playground or something unique so that kids would want to use that playground. |
| 1 | Flip the baseball field to the Southeast corner adjacent to the playground where parents attending a game can feel close to their kids playing |
| 1 | please consider artificial turf as an option for the sports field. This will draw more activity to the park and deter undesirable activity, even at night time. I think this could be accomplished w/o being fenced off, as it is at Irving. |

34. Are there any features that should be removed at Barrie Park?

|-------|--|
| 1 | Concrete walls at playground. Also don't like the block wall along the frontage road |
| 1 | Dead ash trees, dog feces |
| 1 | tot lot- just create one large playground |
| 1 | We do not use sledding hill due to extremely unsafe use by the "mob". Needs to be reconfigured so that there is more than one path for sledders, or the same unsafe conditions will persist. |
| 1 | The basketball courts rarely get used seems to be a waste of space I like the thoughts around creating a pavillion with picnic tables and grills |

35. Do you have any final comments regarding the future of Barrie Park and Center?

| 1 | Better maintenance of sidewalks |
| 1 | My wonderful neighbors need to remember that this is a public park, open to all. |
| 1 | Really appreciate being able to use the stairs for exercise year round. |
| 1 | I think there needs to be a safer connection between the two facilities, it is quite crowded and dangerous on a typical weekend day, when sports activities are ongoing. Working with the Village to redirect or redesign the street would be fantastic. |
| 1 | Please do not remove any trees it's taken a long time for them to get established and I am not one who agrees on the open line of sight ideas the architecture firm is proposing honestly I think that the park they did next to the Library lacks any personality and I would not visit that park because it is boring - I live a block from the park and it is a staple in our community and something we are proud of so please make it exciting! |
| 1 | Please consider utilizing the basket ball court as an outdoor hockey rink in the winter! We would use it several times per week, as would many other kids and adults. In fact, certain times or an area for hockey would be wonderful. |
| 1 | The poor quality of the sports fields (layers of clay and poor drainage) coupled with the volume of activity at the park makes it impossible to maintain the grass. Adding artificial turf would greatly increase usability. |
| 1 | Excited! I feel it would be beneficial in the 3rd public meeting to explain to the public that this master plan may be phased and take multiple years to complete. Is there a timeline for completion that could be discussed? |
| 1 | please do not cut down the trees and eliminating the grass parkway for more pavement in front of Barrie Center. |
| 1 | Damage to grass on sledding hill is caused almost entirely by children using hill without sufficient snow on ground. More all season use could be achievable if some manner of closing the hill were easily accomplished when conditions would cause damage. |
| 1 | Make the north side of Barrie Center (along the reservoir) more pedestrian friendly by flipping the location of the sidewalk and plantings. Put the sidewalk next to the reservoir then a tree parkway beside the street. This will reduce, even eliminate, the amount of snow/ice piled up by the snowplows. A small gutter will be needed at the base of the reservoir wall or a curb at the edge of the top of the reservoir to keep water runoff from the sidewalk. No artificial turf. The pull out/drop off area should not be expanded. The Park District should not cut down trees or put more green space under pavement for the convenience of vehicle drivers. Having to walk a block or two is not justification for permanently eliminating green space. Every inch of open space is important as it serves multiple goods, pavement only serves vehicles. |
